

Tap Into the Future of Room Access with WalletKey

Replace plastic keycards with secure digital keys in Apple and Google Wallet for fast, tap-and-go access.

Built for Convenience. Designed for Modern Travelers.

WalletKey transforms the way guests access multiple touch points throughout the property by replacing traditional plastic keycards with secure, digital keys stored directly in Apple or Google Wallet. Powered by NFC technology, WalletKey enables a fast, tap-and-go experience that is more reliable than traditional Bluetooth solutions. Enhance security, reduce operational costs, minimize environmental impact, and deliver a modern, contactless experience that today's tech-savvy travelers expect from forward-thinking hospitality brands.

The WalletKey Advantage for Your Guests

Offline Access

Utilizing advanced NFC technology, WalletKey ensures your guests have reliable access every time the key is used.

Fully Secure

Reduce the risk of key loss, unauthorized duplication, or misuse with secure, encrypted digital keys.

Sustainable & Cost-Effective

Eliminate plastic waste while reducing ongoing costs associated with physical keycards.

Zero Inventory to Manage

Eliminate the need for key card inventory management. No cards to stock, track, or replace.

Next-Gen Mobile Key Solution

Unlock a better arrival experience with WalletKey

Instant Key Delivery via QR code. No apps required.

Provide Seamless Entry with digital keys for all access points throughout the property.

Manage Digital Key Design through your admin portal, giving you full brand customization control.

Fully Complaint and Vetted by Apple and Google's security standards.
